Professional Summary

B.Tech CSE graduate (CGPA 9.33) specializing in AI/ML, Full-Stack Development, and Business Process Automation. Currently driving enterprise automation as a Power Platform and Zoho Developer, designing robust client-facing applications and data workflows. Experienced in building end-to-end AI products, including multi-agent chatbots (A-Prime.ai, SuperGPT). As an IEEE & Springer-published researcher , I am skilled in Python, LangChain, FastAPI, and Docker, effectively combining hard-coded solutions with low-code tools like Power Automate, Zaiper, n8n & Make to build scalable, intelligent systems.

Technical Skills

Languages & Databases: Python, C/C++, HTML/CSS, SQL, MongoDB, PostgreSQL, Dataverse

Frameworks & Tools: Power Platform (Power Apps, Power Automate, Power BI), Zoho CRM/Creator, LangChain, LangGraph, FastAPI, Flask, Django, Scikit-learn, TensorFlow, Pandas, NumPy, Git, Docker

Core Competencies: Machine Learning, Deep Learning, LLMs, Full Stack Web Development, Business Process Automation, Data Analysis

Experience

Infobyd Software Solution *January 2026 – Present*
Indore, India *Power Platform / Zoho Developer*

- Developed client-facing applications, including HR Onboarding and Equipment Allocation systems, utilizing **Power Apps** (Model-Driven & Canvas) and custom components.
- Architected 10+ **Power Automate** cloud flows (Instant, Automated, Scheduled) with Dataverse and third-party integrations, optimizing state transitions and **Business Process Flows**.
- Implemented stringent role-based access control (RBAC), featuring row and column-level security to ensure data privacy across distinct HR, IT, and Manager workflows.
- Designed interactive **Power BI** dashboards with embedded analytics for comprehensive data visualization.
- Implemented standalone **Zoho CRM** and **Zoho Creator** solutions, configuring custom blueprints, layout rules, and B2B/B2C workflows.

LogiQlink *September 2025 – December 2025*
Indore, India *Python Developer Intern*

- Researched and proposed a scalable B2B authentication architecture for **AutoSlot**, guiding the transition from per-user OAuth to **Google Service Accounts** with **Domain-Wide Delegation (DwD)**.
- Modified **AWS Lambda** functions for the **TradeAstra** platform, using **Boto3** to dynamically structure and sync data from **AWS S3 Buckets** to **Amazon DynamoDB** as per frontend requirements.
- Contributed to R&D reports for **AutoSlot** and **TradeAstra**, analyzing **AWS** architectures and guiding changes for **DynamoDB** data models and **Lambda** data flows.

Supersourcing *July 2025 – September 2025*
Indore, India *AI/ML Intern*

- Enhanced the **SuperGPT** enterprise chatbot by engineering two new AI agents for role-based dashboard access and team performance queries, expanding its capabilities from 4 to 6 core functions.
- Architected and implemented a multi-agent framework using **Langchain** and **Langraph**, enabling a single user query to be processed by multiple specialized agents simultaneously.
- Contributed to the development of AI solutions for partner products, including data curation for **getprojects.ai** using **PostgreSQL** and foundational analysis for an e-learning chatbot (**Shule Direct**).
- Utilized **FastAPI** to build and expose robust API endpoints for chatbot functionalities, ensuring seamless integration and communication between agents and the frontend.

IBM Global Remote Mentorship *July 2024 – December 2024*
Pune, India (Remote) *Machine Learning Research Intern*

- Developed **Web-BCD**, a breast cancer detection system using the Wisconsin dataset, achieving high accuracy.
- Engineered an ML model with Python (Pandas, Numpy, Scikit-learn) and a Sequential Neural Network.
- Deployed the model using Flask and integrated it with an interactive HTML/CSS/JavaScript interface.
- Earned an IBM SkillsBuild certificate and received mentorship from an industry expert, enhancing technical and project management skills.

Education

Medi-Caps University *July 2023 – May 2025*
Indore, India *B.Tech in Computer Science, CGPA: 9.33*

Medi-Caps University *June 2021 – July 2023*
Indore, India *B.Sc in Computer Science (AIML), CGPA: 8.88*

Karnataka Vidya Niketan School *2021*
Indore, India *MPBSE, 12th Standard – 86.2%*

Karnataka Vidya Niketan School *2019*
Indore, India *MPBSE, 10th Standard – 85.4%*

Projects

Enterprise Operations Suite | **Power Apps, Power Automate, Dataverse** *January 2026 – Present*

- Developed a comprehensive suite of business applications, including a scalable **"hot desking"** Seat Reservation system that utilizes Dataverse master data tables for dynamic floor and seat configuration.
- Engineered an **Equipment Request App** featuring conditional Power Automate workflows, triggering automated manager approval emails with actionable accept/reject buttons for resource requests exceeding 1 Lakh.
- Built an **Employee Onboarding App** solution governed by structured Business Process Flows, implementing robust row- and column-level security roles to ensure strict data privacy and governance.
- Enforced complex validation rules across the suite, such as a strict **"one user, one seat"** daily policy, duplicate booking prevention, and real-time visual UI indicators for resource availability.

A-Prime-AI | **Multi-Agent Chatbot Platform** *May 2025 – September 2025*

- Developing **A-Prime-AI**, a multi-agent chatbot platform using Python with a robust FastAPI backend.
- Engineered an intelligent routing system using a Groq-powered LLM (Llama 3) to delegate tasks to specialized agents for web search, image generation, code creation, and Q&A.
- Integrated external APIs: **Tavily** for web searches, **Stability AI** for image generation, and **Groq** for high-speed language processing.
- Implemented a persistent, long-term memory system using **MongoDB** to store and retrieve user chat sessions and conversation histories.

SuperGPT | **Enterprise AI Agent Enhancement** *July 2025 – September 2025*

- Engineered a role-based access control (RBAC) agent to govern chatbot interactions with dashboards, ensuring users could not access data beyond their authorized permissions.
- Developed a conversational agent for team dashboards, allowing managers to query team member performance metrics and delegation structures using natural language.
- Upgraded the chatbot's core logic to support multi-agent workflows, designing a system where complex queries are decomposed and routed to multiple agents for a comprehensive response.
- **Tech Stack**: Python, Langchain, Langraph, FastAPI, Large Language Models (LLMs).

Research & Publications

IEEE Publication | ***KrishiDisha: AI-Driven Crop Optimization Platform*** *October 2024 – April 2025*

- Authored research paper titled *"KrishiDisha: Revolutionizing Agriculture with Intelligent Recommendations, Disease Detection, and Yield Prediction"*, accepted for the *2025 International Conference on Engineering Innovations and Technologies (ICoEIT)* and **published in IEEE Xplore**.
- Integrated crop/fertilizer recommendations, disease detection, and yield prediction using ML models (Random Forest, CNN).

- Developed an AI-powered chatbot for instant, personalized agricultural guidance and implemented multilingual support.
- Deployed the platform using Flask with a user-friendly interface to improve accessibility for farmers.

Springer Nature Publication | ***Student Dropout Analysis using ML/DL*** *October 2023 – January 2024*

- Co-authored and presented a paper at WCSC 2024 analyzing factors influencing student dropout using ML and DL algorithms.
- Published by **Springer Nature** in the *Studies in Smart Technologies* series (April 2025). DOI: 10.1007/978-981-97-9006-7_20.

Certifications

Celonis: Academic Process Mining Fundamentals *July 2024*

IBM: Data Science & Machine Learning with Python *July 2024 & July 2023*

NPTEL IIT Madras: Python for Data Science *April 2024*

Cisco: Python Essentials, Networking Essentials, OS Basics *April 2023*

Awards

CodeVir (All India Rank: 17) | **iNurture Education Solutions** *January 2023*

Runner-Up (Silver Medalist) - National Transtemporal Tattle Trials *January 2022*
